The Associate of Applied Science (AAS) in Airway Science Technology has been designed to prepare students to apply technical knowledge and skills to the flying of commercial, agricultural, public service, corporate, or private airplanes, and to prepare students to sit for the Federal Aviation Administration (FAA) written and practical examinations. In addition, the AET program provides lower-division general studies courses toward related programs at Arizona State University East (ASU E), or transfer options to the University of North Dakota.

- **Bachelors of Applied Science, Aviation Management Technology**

We encourage all AET students to meet with their AET Academic Advisor to discuss transfer options.
