

EXPLORE PRAGUE

The Czech Republic is geographically situated in the center of Europe. Czechs like to think of their country as “the bridge between East and West.” Bordering Germany, Poland, Slovakia and Austria, the country has always been an important crossroad.

The City of Prague is also known as the “City of 100 Spires.” Its compact medieval center remains an evocative maze of cobbled lanes, ancient courtyards, mysterious passages and churches beyond number, all watched over by a 1000 year-old castle. Prague was one of the few European cities relatively untouched during the world wars, allowing its historic architecture to stay true to form. Prague is a traditional cultural center of Europe, hosting many festivals and concerts.
